The Adventures of Bubba and Tex

Longhorn Bubba and Armadillo Tex crossed NASA Road 1 with a chicken to get to the NASA Space Center. Dillo Tex asked, "Hey, why did that chicken cross the road too?" Bubba replied, "To show the Armadillo that it can be done!". "Touché", agreed Tex. They arrived at the space center and when no one was looking, they snuck aboard a rocket ship when suddenly Bubba's long horn poked the start engine button and blasted off. A really tall Cowboy with a really long rope lassoed the ship back to earth dropping on the Beach in Louisiana where the mouth of the Mississippi empties. After de-boarding the ship, Bubba swiftly swam upstream with Tex on his back. You see - Acadia, a 34.5' Alligator was in close pursuit in the muddy waters of the mighty Mississippi. But, she was only trying to catch up to tell them there's a cool Jazz festival going on just around the next bend. Upon arriving at the festival, the Crawfish boils were rolling. Bubba, Tex and Acadia donned their bibs and ate to their hearts content at the "fais do-do". They all lived happily ever after.

So I was riding along on my Longhorn named Bevo to go get me some crawfish and listen to some jazz.

On the way to my favorite jazz place, we came across a 15ft alligator named Cowboy. He told us all about that he just escaped from Nasa before he was sent into space. Cowboy was so thankful he didn't have to ride in a rocket. Now that he is free, he is headed to the beach to visit his cousin Hank the Armadillo.
